visiomatic® Home System

Lifestyle and Luxury

Building Technology

Entertainment

Infotainment

Communication

Individual luxury, greatest comfort, maximum security! Using the visiomatic® Home System, controlling your building's security technology and entertainment media can be as simple as playing a game. Whether on the site or travelling, you will always have everything under control: alarm system, heating and air conditioning system, answering machine, lighting and window shade controls, telephone, Internet and e-mail, DVD player, video intercom, home cinema, traffic reports, world clock, stock market news, weather forecasts and so much more.

visiSoft®

The innovative software for the intelligent building!

visiPad®

The design touch panel for intuitive operation!

visiServer®

The ultimate controller for the visiomatic® Home System!

FUNCTIONS

Comfort and Control

Building Technology

The visiomatic® Home System makes use of individually customised floor plans and easily understandable icons that allow you to activate, regulate and monitor building technology in just seconds. Features include:

- *Lighting conditions*
- *Alarm systems*
- *CCTV, video monitoring systems*
- *Awnings and window shades*
- *Air conditioning and heating systems*
- *Sensors*

Infotainment

The visiomatic® Home System paves the way so you can easily access global and personal information. Select from among such functions as:

- *Internet- and search engines*
- *Personal e-mail*
- *Weather and climate forecasts*
- *Stock market information*
- *Timely traffic reports*
- *Cinema and TV programmes*
- *Insightful news reports*
- *Cooking recipe suggestions*

Communication

Besides all of its other comfortable features the visiomatic® Home System provides you with fast communication:

- *ISDN telephony, VoIP*
- *Caller ID*
- *Address book*
- *Answering machine*
- *Video telephony*
- *Video intercom and door-opener*

Entertainment

The world of entertainment at your fingertips. Use the visiomatic® Home System to control for example:

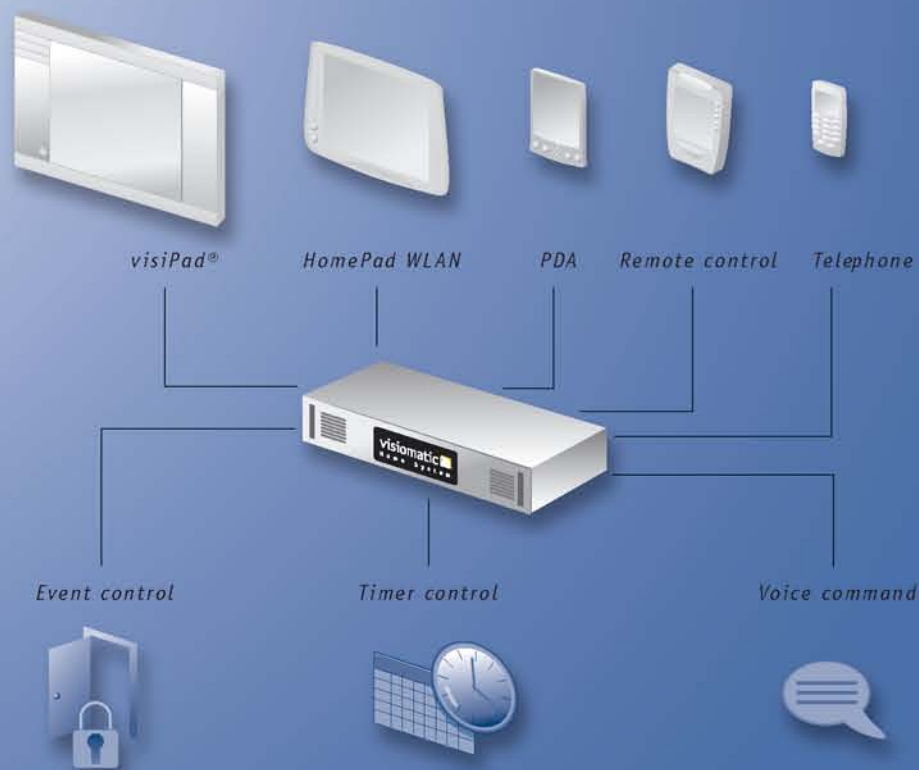

- *Audio multi-room systems*
- *Home cinema, THX, Dolby Digital*
- *HD TV, PiP, TV-Preview*
- *Digital Video*
- *CD/DVD selection*
- *Radio and web radio*
- *Audio and video streaming*

INTEGRATION

Operation and Use

Your visiomatic® Home System carries out every command, promptly and reliably - Whether through a permanent installation, wireless by radio or infrared. The system be reached via Internet and from any telephone in the world - it can also forward messages to you, for example, about the current security status instantly - even as an SMS.

Use the unique visiPad® touch display, infrared remote control or wireless remote control, TabletPC or PDA, voice command or timer control to operate your visiomatic® Home System. The system is also open and perfectly prepared for future technologies.

Thanks to its modular structure, the visiomatic® Home System can be used in widely varying areas and can be customised to meet your individual requirements:

Private home All of the functions are bundled and centralised at your fingertips.

Conference room Set all of the devices to the desired parameters with only one function.

Hotel High-end equipment in suites providing that certain "extra something".

Private clinic Enjoy the comfort of international first class hotels in every room.

Yacht and Jet No need to do without any of the modern comforts of living while travelling.

PRODUCTS

Software and Hardware

Succinct technical information, flexible performance without restriction - independent of time and place. It is your choice: the multifunctional visiPad® design touch panels have been developed especially for the visiomatic® Home System. The visiomatic® Home System is also compatible with Windows® based TabletPC and PDA as well as programmable infrared and radio remote controls - either simultaneously or individually. You have complete freedom of choice with the visiomatic® Home System.

visiSoft®

The innovative software from visiomatic connects, controls and visualises all home technologies comfortably and easily. A large number of open interfaces on the ready-to-go product visiSoft® ensures a seamless, harmonious interaction of common building systems, such as EIB®, LON®, LUTRON® and other systems from leading manufacturers with the multi-room audio system and the home cinema, the alarm system and security equipment, the Internet and communication technology and more. The multi award-winning, excellent and consistent design of all visiSoft® function modules permits easy and intuitive operation of the technology throughout the building. visiSoft® is completely installed on the visiServer® and establishes the basis for the visiomatic® Home System.

visiPad® SL18

Unique multi-media display in exclusive design with high resolution 18" colour touch-screen, true colour with 1280 x 1024 pixels, CCD colour camera, microphone, integrated stereo loudspeakers, volume control, without fan, silent operation, international multi-award winning design.

visiPad® TT Serie

High-quality design touch-display with continuous ThroughTouch glass panel in many sizes, optional with integrated stereo loudspeakers and microphone, infrared receiver, waterproof or mirrored-glass, without fan, silent operation, high-performance at the ratio of 4:3 or 16:9 and DVI quality if desired.

visiServer®

This uniquely powerful, industrial high-end controller has been designed for international standard interfaces such as RS232, LAN/WAN, USB, infrared and more. visiServer® achieves its full multi-media capability with the addition of various TV/Video/Audio cards. Set up options include a 19" rack mounted server or as an extra silent device without a fan. The ultimate controller for the visiomatic® Home System provides top performance and maximum security.
